

Instruction for Submission of Papers

International Journal of Multidisciplinary Quest is a peer reviewed international journal published once in a year (January-December) of every calendar year and is registered with National Serials Data Program, Library of Congress (ISSN). It is a referred journal designed to promote multidisciplinary enquiry on research, education and development. The journal contains research-based articles on Social Science, Law, Education, Business, Arts, Science and Technology. Contributors are requested to submit articles both in hard and soft copies for publication in the Journal. The following may kindly be treated as broad guidelines for submission of article.

Terms and Conditions of Submission of manuscript

Manuscripts are reviewed with the understanding that they

- are original;
- are not under consideration by any other publisher;
- have not been previously published in whole or in part;
- have not been previously accepted for publication;
- will not be submitted elsewhere until a decision is reached regarding the publication

Manuscript Format and Style Guide

When the Editor sends manuscripts for external review, they are double-blind reviewed. Thus, please ensure that no authors' names are given on the first page of the manuscript and that author names have been taken out of the "File-Properties" screen in word.

All manuscripts should be double-spaced. Margins should be one inch (2.5cm) at the top, bottom and sides of the page. Front size should be 12 point. We require that submissions be limited to 8000-10000 words of text, unless an exception has been granted based on discussion with the Editors in advance of submission. This recommended word count refers to the entire content of the article, including abstract and references. Articles with heavy use of figures or tables should be correspondingly shorter to compensate for these.

Title of the Article

The title of article should be short and catchy. Title should not be in statement form. Also include the author's names, affiliations and contact details (including email address) for the corresponding author.

Abstract

Authors are requested to submit an unstructured abstract of no more than 250 words. Abstract will focus the total picture of the article in a nutshell. Please make sure that the abstract page does not contain any information identifying the author(s). Also please take care to select a title and an abstract that are direct and 'readers friendly'.

Keywords

Include not more than five keywords that describe your paper for indexing and for web searches of your manuscript.

References in the Text

The citations should follow the Harvard system, included by the authorship and the year of the work. Each citation requires a reference at the end of the work with full details of the source item and should enable it to be traced.

Example

There is variation of rainfall with respect to place and time (Islam, 2005). Personal communications should be listed as such where they are cited in the text, and not listed in the references.

Example

Results have been reported (Don Graham, 1989, personal communication).

Articles not yet published should show 'forthcoming' in place of the year (in both the reference and the citation). 'In presses' should be used in place of the volume, issue and page range details.

Example

Sharp Parker, A.M. (forthcoming) Cyber terrorism: An examination of the preparedness of the North Carolina local law enforcement. *Security Journal*, in press.

References

References should be placed alphabetically by author or authorship, regardless of the format, i.e. whether books, websites or journal articles etc.
